ProjectX Company Profile

ProjectX Technology is a leading on-line mapping software development company based in Wellington, New Zealand. ProjectX specialises in creating simple solutions which make it easy for businesses and local communities to connect with each other.

Since the launch in August 2005, ProjectX has established itself as one of New Zealand's leading on-line mapping solutions provider with its flagship products: ZoomIn (www.zoomin.co.nz), Smaps (smaps.co.nz) and the underlying ZoomIn Mapping System (developer.zoomin.co.nz). The company has also released a ZoomIn site in Australia (www.zoomin.com.au).

The accolades for ProjectX have come from big businesses, such as TradeMe, who selected ProjectX to implement its Smaps product in 2006 and other major accounts such as Greater Wellington Regional Council, NIWA and the Flight Centre. ProjectX also provides support and free services to community initiatives, for example Capital Soccer and the Rotary Club of New Zealand.

ProjectX has been recognised by the industry for its innovation and vision in November 2006 with two prestigious TUANZ awards in craft and inspiration categories.

ProjectX builds technologies that businesses, individuals at home and communities can use to enrich their businesses and lives.
